MATHEMATICS OF THE USSR—IZVESTIYA

Том 50, №№ 4–6, 1986

Volume 29, Numbers 1–3 Pages 1–690

Volume Index of Authors

Babets, V. A. Pseudoforms with negative curvature on CP_n 677

Bezuglyĭ, S. I. and Golodets, V. Ya. Outer conjugacy of the actions of countable amenable groups on a measure space 1

Bozhich, E. S. On arithmetic with the notion of "attainable number" 477

Brailov, A. V. Construction of completely integrable geodesic flows on compact symmetric spaces 19

Danilov, V. I. and Khovanskiĭ, A. G. Newton polyhedra and an algorithm for computing Hodge-Deligne numbers 279

Drakokhrust, Yu. A. and Platonov, V. P. The Hasse norm principle for algebraic number fields 299

Fomenko, A. T. The topology of surfaces of constant energy in integrable Hamiltonian systems, and obstructions to integrability 629

Grigor'ev, D. Yu. The complexity of the decision problem for the first order theory of algebraically closed fields 459

Guba, V. S. A finitely generated complete group 233

Ivashkovich, S. M. The Hartogs phenomenon for holomorphically convex Kähler manifolds 225

Khaĭner Tsishang [Heiner Zieschang], Minimal geodesics of a torus with a hole .. 449

Khukhro, E. I. A new identity in the Lie ring of a free group of prime exponent, and groups without the Hughes property 659

Kucherenko, V. V. and Motylev, L. Yu. The limits of applicability of the canonical operator method for nonstrictly hyperbolic equations with nonsmooth characteristics 95

Kucherenko, V. V. and Osipov, Yu. V. Exact and asymptotic solutions of systems with turning points 355

Kulikov, V. S. Minimal objects of algebraic spaces 81

Makarov, N. G. Perturbations of normal operators and stability of the continuous spectrum 535

Maz'ya, V. G. and Nazarov, S. A. Paradoxes of limit passage in solutions of boundary value problems involving the approximation of smooth domains by polygonal domains 511

Mit'kin, D. A. An estimate of the number of terms in Waring's problem for polynomials of general form 371
Nenashev, A. Yu. Siegel cusp modular forms and cohomology 559
Orevkov, S. Yu. On three-sheeted polynomial mappings of $\mathbf{C}^2$ 587
Panin, I. A. On a theorem of Hurewicz and K-theory of complete discrete valuation rings 119
Peller, V. V. Spectrum, similarity, and invariant subspaces of Toeplitz operators 133
Premet, A. A. On Cartan subalgebras of Lie p-algebras 145
Sergeev, A. G. Complex geometry and integral representations in the future tube 597
Stepin, A. M. Spectral properties of generic dynamical systems 159
Sternin, B. Yu. and Shatalov, V. E. On an integral transform of complex analytic functions 407
Tamrazov, P. M. Contour-solid results for holomorphic functions 193
Trofimov, V. I. The action of a group on a graph 429
Troitskiĭ, E. V. The equivariant index of C^*-elliptic operators 207
Zarnadze, D. N. On Fréchet spaces with certain classes of proximal subspaces ... 67
Zaslavskiĭ, A. Ya. Ground states in a model of Frenkel-Kontorova type 323
Zhikov, V. V. Averaging of functionals of the calculus of variations and elasticity theory 33

ABCDEFGHIJ–8987
